

FRAME è la nuova frontiera delle coperture tensionate: sistema di tensionamento con molle a gas, trasmissione a cinghia ad alta resistenza, sistema di chiusura laterale ZIP opzionale, cassonetto completamente ispezionabile rendono FRAME il prodotto che mancava. Disponibile solo motorizzato per raggiungere dimensioni fino a 600x600 si fissa sia su piedini snodati indipendenti che a muro. L'innovativo profilo frontale chiude il perimetro della tenda e contiene il terminale rendendo il design di FRAME unico e inconfondibile, oltre che rendere tecnicamente più stabile la struttura.

FRAME is the new frontier of tensioned covers: its tensioning system with gas springs and the high strength belt driven, along with the optional side ZIP system and the completely inspectionable cassette, make FRAME the product that was missing. Available only in motorized version to reach sizes up to 600x600 cm, it can be installed both on independent articulated feet and on wall. The innovative front profile closes the structure perimeter and contains the terminal profile, making FRAME design unique and unmistakable, as well as offering a technically more stable structure.

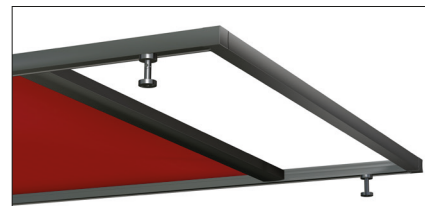

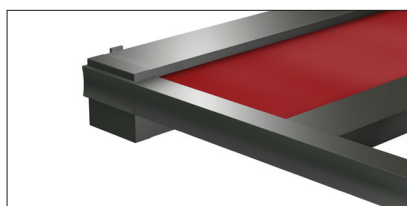

## Caratteristiche generali

- Tubo avvolgitore da 100 mm
- Disponibile solo motorizzata
- Viteria Inox certificata italiana
- Installazione a parete e con piedini
- Molle a gas
- Dimensione massima 600x600 cm

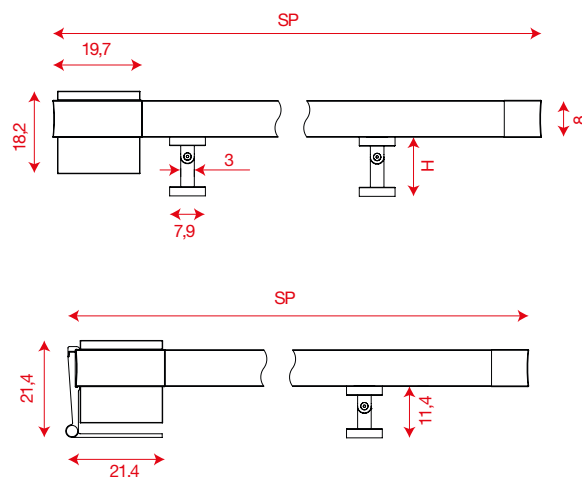

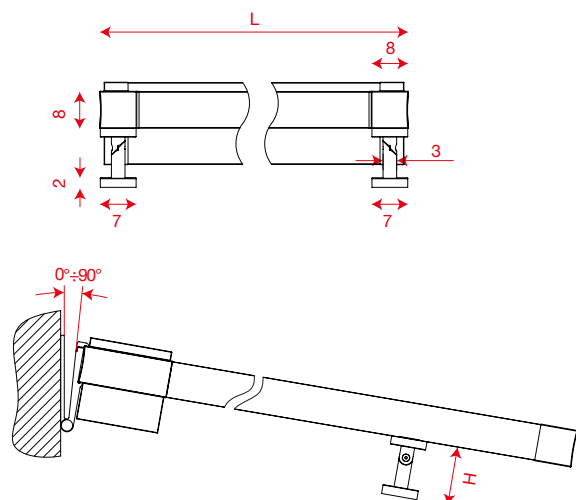

## General features

- Roller tube 100 mm
- Only motorized
- Certified Italian Stainless steel screws and pins
- Installation on wall and with feet
- Gas springs
- Maximum sizes 600x600 cm
